

MediCase database FASSprosp

- Web browser
- How to register a user and a case in MediCase
- General principles
- eCRFs in MediCase
- When more than one site is involved in a case
- Retrospective data input

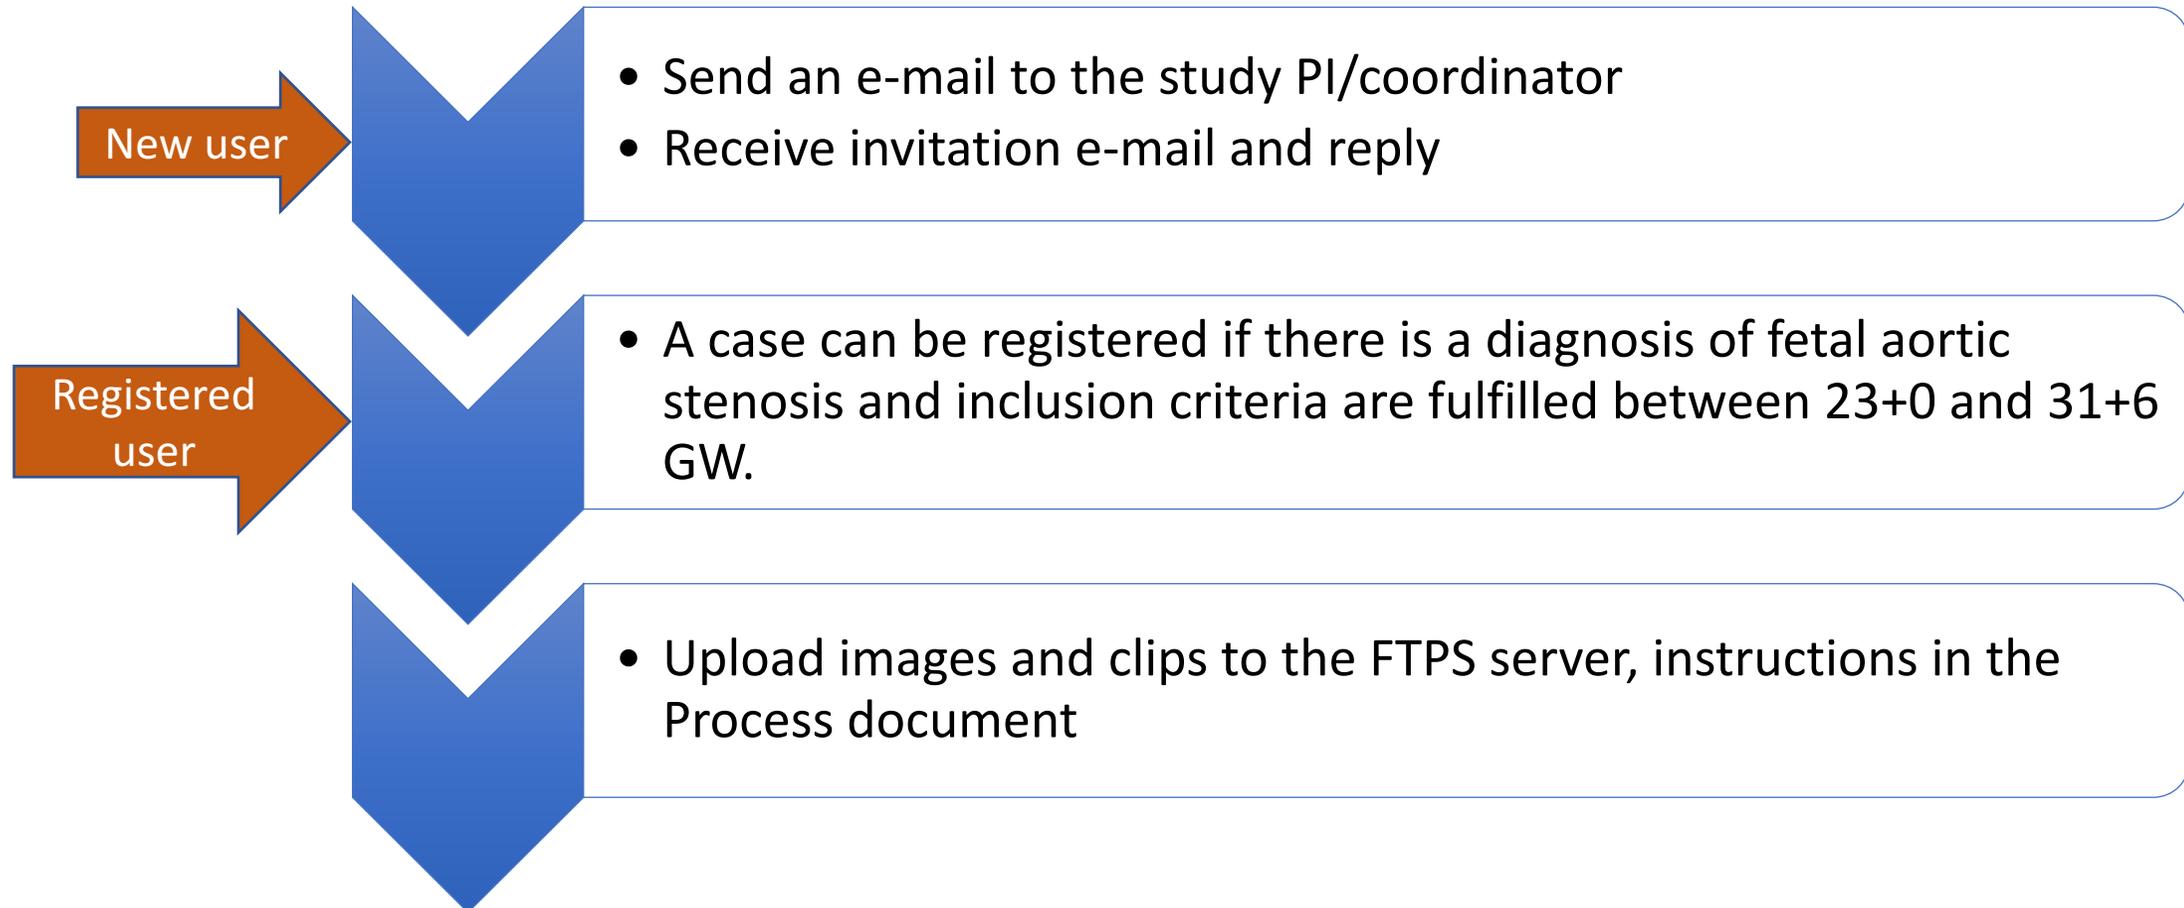

Web browser compatibility

MediCase is compatible with most modern web browsers, including updated versions of **Chrome, Safari, Firefox and Edge**.

It is supposed to be compatible also with Internet Explorer but some users may experience minor problems using Internet Explorer in certain environments.

Since Internet Explorer is no longer supported by Microsoft we recommend not to use it with MediCase.

Register in MediCase FASSprosp

General principles FASSprosp

1. Help and instructions for the user; user manual MediCase
2. Add a new subject
3. Warnings, out of expected range
4. When data is not available

1. User manual

The screenshot shows the FASSprosp application interface. On the left, a sidebar menu is open, listing various functions: Subjects, Visit planning, Signing, Locking, Data export, Reports, Administration, Demo mode, and User manual. The 'User manual' item is highlighted with a blue arrow. The main content area displays a table with columns for Site and Status. The table contains several rows, all with 'GOT' in the Site column and 'Included' in the Status column. A blue arrow points from the text 'User manual' on the right to the 'User manual' menu item in the sidebar.

	Site	Status
	(All)	(All)
	GOT	Included

2. Add a new subject

☰  FASSprosp

>>

 **Add a new subject**

...

Site *

Add subject

Cancel

Add a new subject,
below, on the left-hand side of the screen

3. Warnings

2D

Mitral valve 2D

Mitral valve diameter, 4 ch view in end diastole i

mm

Warning Value is typically between 0.1 and 10

A warning is a note that the value could be out of range, but with no other consequences for data input.

- Check the value and continue without changes, if the value is what you want to put into the system

4. Data not available FASSprosp

Tricuspid valve 2D

Tricuspid valve diameter, 4 ch view in end diastole ⓘ

 mm

Error Required (or mark as omitted)

Tricuspid valve 2D

Tricuspid valve diameter, 4 ch view in end diastole ⓘ

 mm

Error Required (or mark as omitted)

- Omit value
- Add a comment
- Add a query
- View log

Left ventricle

Left ventricular inlet length in end-diastole ⓘ

 mm

× Omit field

Enter a comment to omit the field:

Omit field

Cancel

If data is not available, the field needs to be marked as omitted and note a comment

eCRFs

eCRFs in Medicaase

FASSprosp

- Inclusion
- Baseline fetal echo at 23+0 to 31+6 GW
- Follow up fetal echo at 33+0 to 34+6 GW
- Neonatal
- Follow-up at 2 years of age
- Additional eCRFs

Inclusion

- **Select site when adding a new subject**
- Select your workplace/site

- **Eligibility screening and inclusion**
- Check that inclusion and exclusion criteria are satisfied

- **Inclusion**
- Confirm that the case can be included, include subject

Baseline Fetal Echo, 23 + 0 to 31 + 6 GW

- **Baseline Fetal Echo at 23+0 to 31+6 gestational weeks**

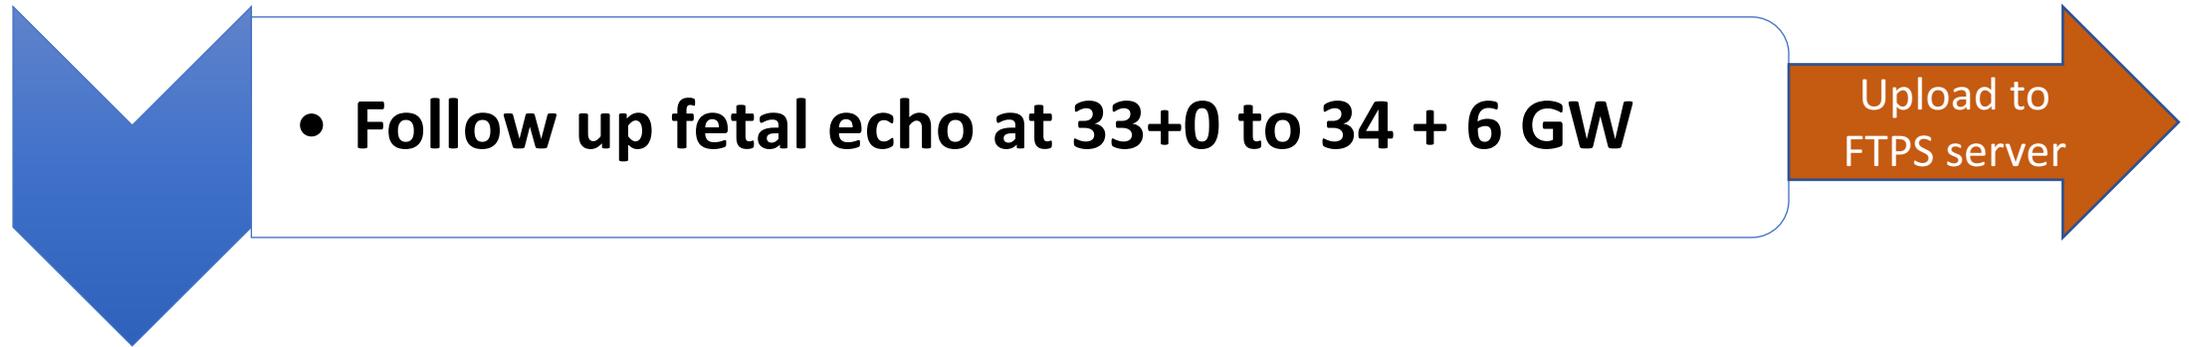

Upload to
FTPS server

- **Additional Baseline Fetal Echo**
- If an intervention is decided later, after the upload of a Baseline fetal echo, *an additional baseline fetal echo should be added*. This fetal echo should be the last echo before intervention

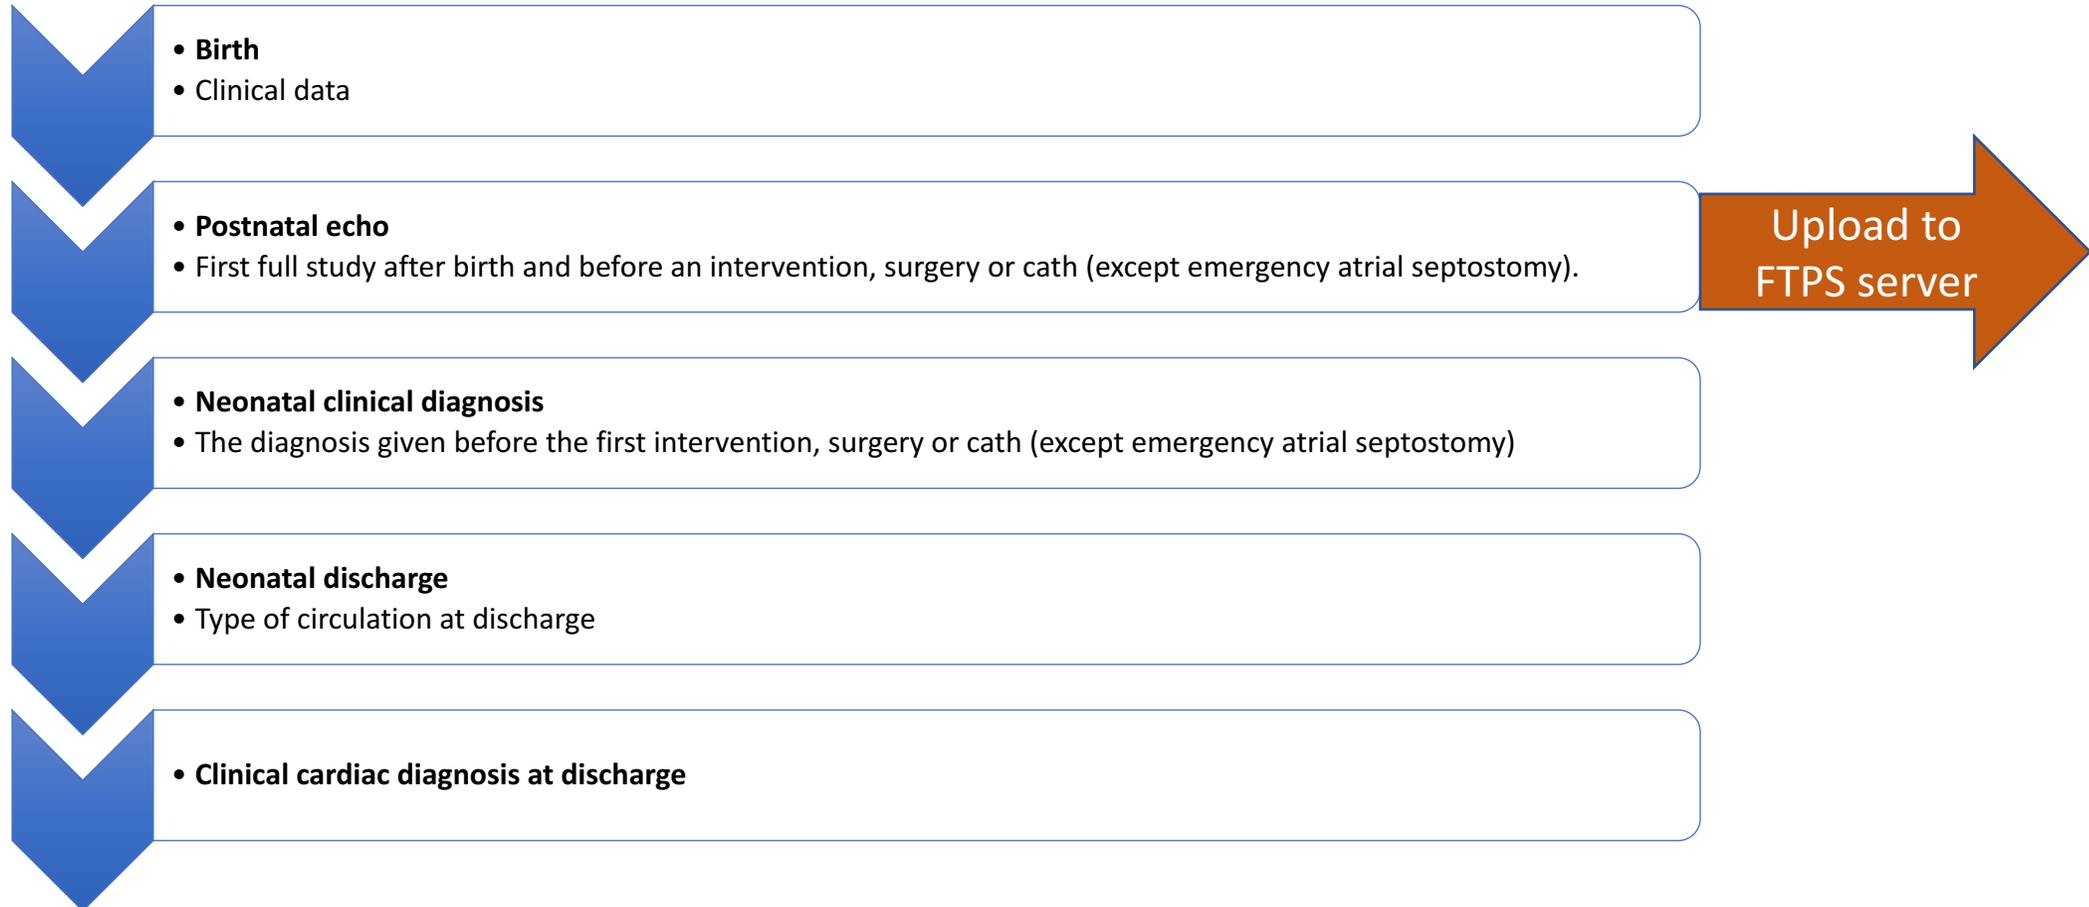

Upload to
FTPS server

+ Add visit "Additional Baseline Fetal Echo"

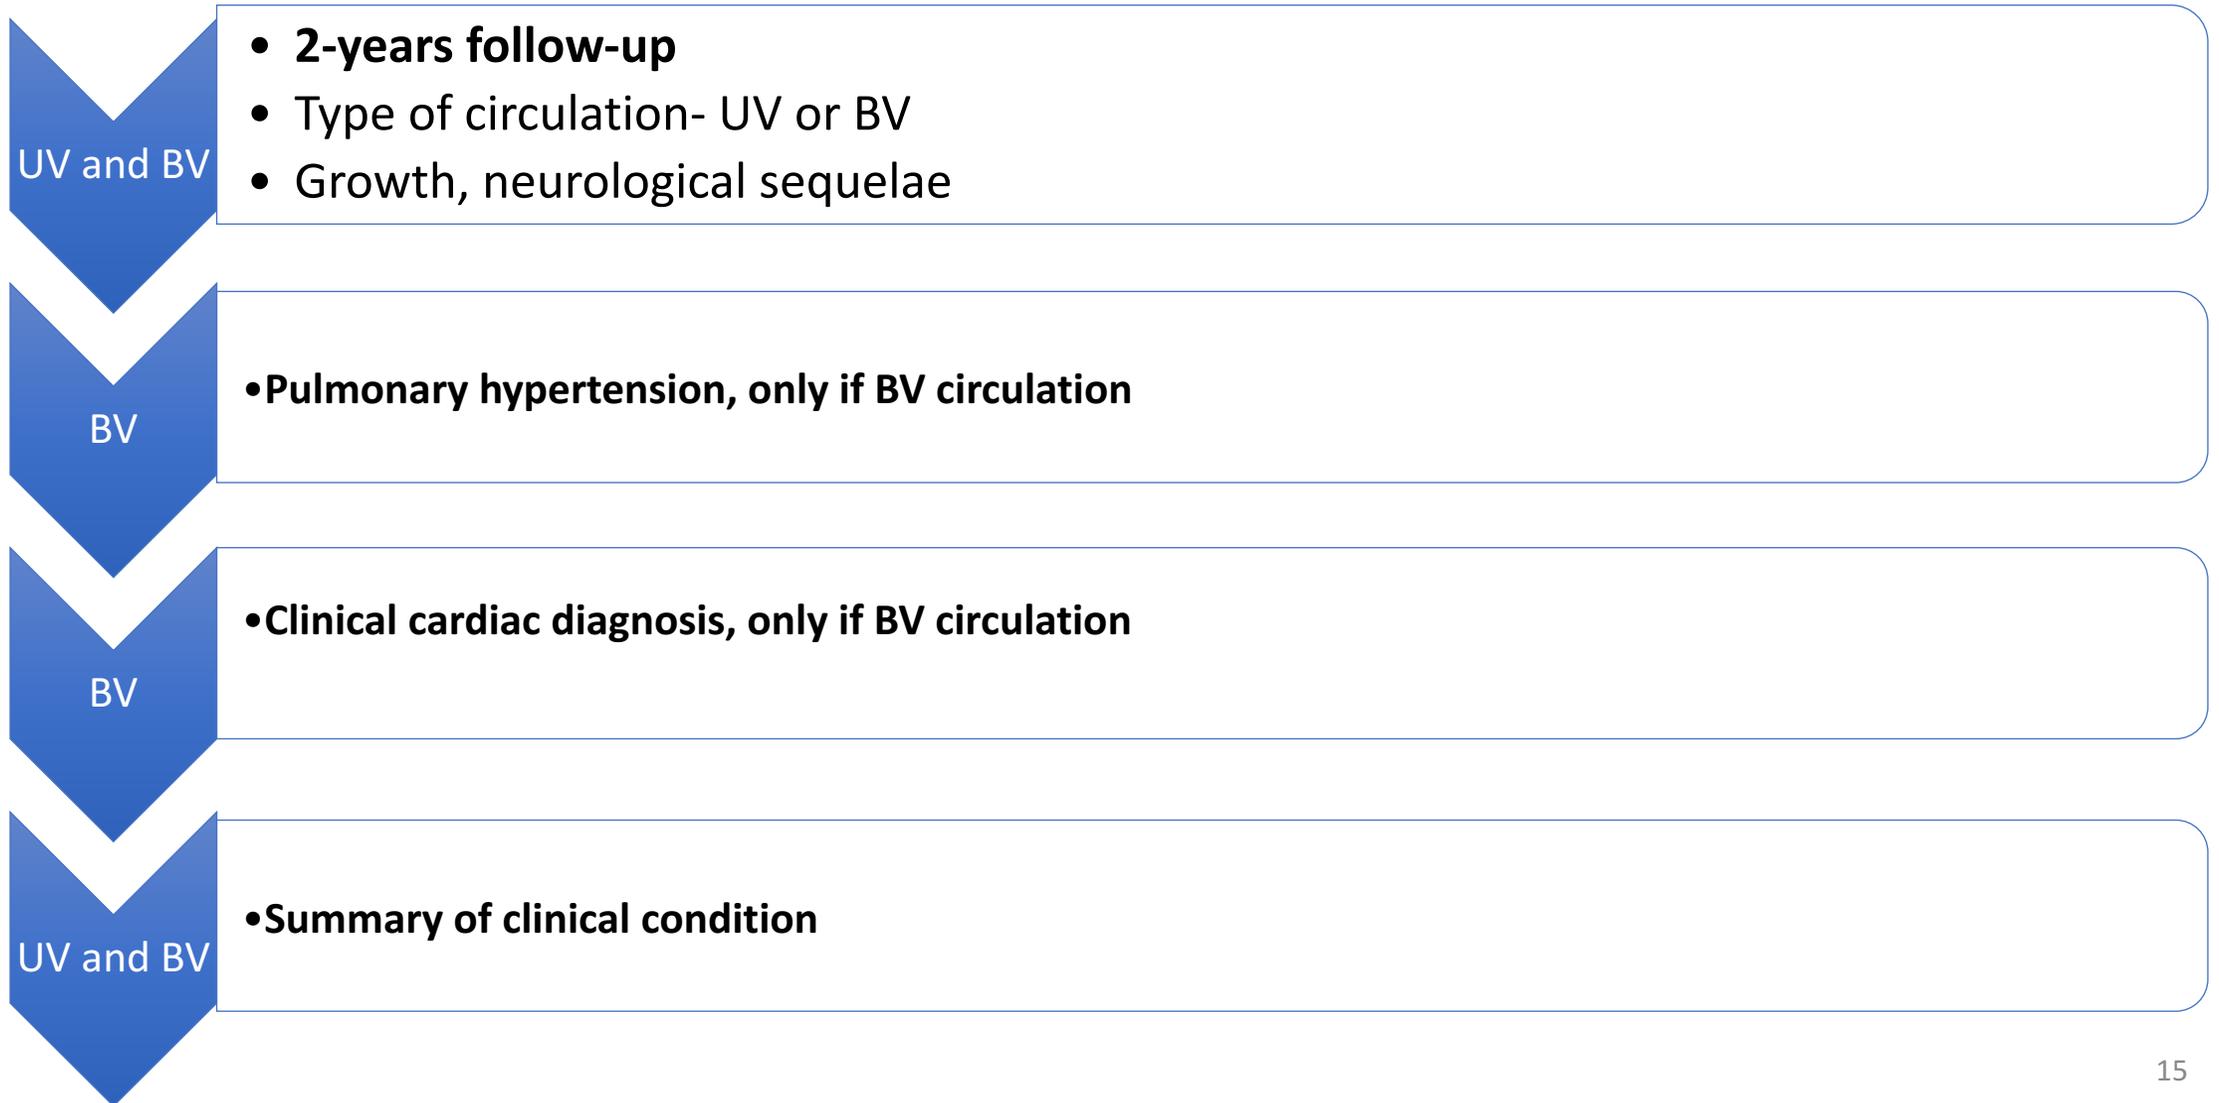

Follow- up fetal echo, 33+0 to 34+6 GW

Neonatal

Follow-up at 2 years of age

Additional eCRFs

- **Use one eCRF *per* procedure**
 - Counselling on fetal valvuloplasty
 - Fetal intervention
- **Use one single eCRF for *all* procedures**
 - Postnatal procedures
- **At the end of study use the eCRF "Subject termination"**
 - End of study; ToP, IUFD, postnatal death, HTX, lost to follow-up, withdrawn consent and completion of study at 2 years of age

More than one site FASSprosp

There is the possibility that more than one site can be involved in a case.

Example:

- Site A- Fetal diagnostic center
- Site B- Fetal cardiac intervention center
- Site C - Postnatal intervention center
- Site A “Adds a new subject” in the MediCase database
- Site A gives the right to Site B and C to access Site A (Contact Study coordinator/PI)
- Site A gives the case-Id to Site B and C
- Site B and C add relevant data in the MediCase database

Retrospective data input

- “Date of entry” - the date when data input is made
- “Visit date” - the date when the case was seen
- If visit date \neq date of entry; change visit date
