

APC 2024 ANNUAL MEETING - SCIENTIFIC PROGRAMME														
Legend	WIS Sessions	Abstract Sessions	Nursing Sessions	Scientific Program	Plenary & Keynote Lectures	Business Meetings								
Time	Wednesday, 9 May 2024													
VARIOUS HALLS														
16:30 - 18:00	OPENING CEREMONY & MANNHEIMER LECTURE Present and Future of Pediatric Cardiovascular Critical Care, Checks & Balances Edwards de Ceu, USA													
18:00 - 19:30	WELCOME RECEPTION													
Thursday, 9 May 2024														
Time	Hall 1 - Archive Hall	Hall 2 - Despachos Hall	Hall 3 - Noble Hall	Hall 4 - Infante Hall	Hall 5 - D. Maria Hall	Hall 6 - Luis Hall	Hall 7 - Porto Hall							
08:00 - 09:00	BUSINESS MEETING Cardiac dysrhythmias & electrophysiology						BUSINESS MEETING Pulmonary hypertension, heart failure and implantation WG							
09:00 - 11:00	APC BUSINESS MEETING Chair: Nico Blom (The Netherlands)						BUSINESS MEETING Adult Congenital Heart Disease							
11:00 - 11:30	BREAK						BREAK							
11:30 - 13:00	Challenges in Heart Failure and Transplantation in Pediatrics Chair: Zdenka Reinhart, UK & Håkan Wiklund, Sweden		Cath MB	Prevention of Sudden Cardiac Death over the Lifespan Chair: Guido Pieles, UK & Doris Thüring-Schettbäk, Austria		Challenges in Postoperative Arrhythmias Chair: Damien Schaffner, France & Joana Pimenta, Portugal		Stress imaging in Pediatric Cardiology Chair: Heiner Latze, Germany & Sylva Krogstevik, UK		Oral Abstract Session 01 - Adult Congenital Heart Disease Chair: Margarita Brida, Brazil & Jaspal Dua, UK		Challenges and barriers for nursing research and leadership across settings Chair: Michèle de Hoonen, Belgium & Yali Vanheren, Belgium		
	Significant proportion of infants with complex CHD still don't survive childhood: who are they and can we improve their life expectancy? - Aneirin newns, Canada		What does an interventionist expect from Cath MB? - Adriana Tafà, Greece	Intrabreath death - are channelopathies the reason? - Amelie Wacker-Gusmann, Germany		Diagnosis of postoperative arrhythmias - Guilherme Lourenço, Portugal		When & how indications and tests - Sylva Krogstevik, UK		Cardiac output drop reflects circulatory arrhythmia after Fontan completion: serial cardiac, magnetic resonance study - Sara Camilla Antegiani, The Netherlands		Self-efficacy for Clinical Nurse Leaders - Marlene Carvalho, Portugal		
	What are the best ways to prevent heart failure in adult life or make it more difficult to successfully transplant ACHD patients - can we rethink them? - Mohamed Nasar, UK		Prevention of Sudden Cardiac Death in Young Athletes - Sérgio Laranjeira, Portugal	Sudden infant death - what do we need to know? - Silvia Castellotti, Italy		Postoperative management - A practical approach - Jane Sanchez de Toledo, Spain		Pharmacological perfusion and stress CMR - Christian Meierhofer, Germany		Digital Twins for Diagnosis and Treatment Planning in Patients with Univentricular Palliation - Jan Brügel, Germany		Leadership in nursing research - Kathleen Manalo, USA		
	Can mechanical support for ACHD patients delay transplant or offer opportunities for those who are currently transplant ineligible? - Magda Lachowicz, France		Risk Stratification of Sudden Cardiac Death in CHD patients - Werner Röthig, Belgium	Screening and prevention of postoperative arrhythmias - Matheus Le Blas, Switzerland		Screening and prevention of postoperative arrhythmias - Matheus Le Blas, Switzerland		Dynamic stress CMR - Wien Heindl, The Netherlands		Univentricular failure: relevance of incorporating CPETecho in a dedicated Fontan clinic - Aleksandra Cieplucha, Poland		Leadership differences in the incorporation of CPETecho in a dedicated Fontan clinic - Aleksandra Cieplucha, Poland		
	How can we improve outcomes from transplant in ACHD? - Lucy Roche, Canada		How can we improve outcomes from transplant in ACHD? - Lucy Roche, Canada					Preliminary results - Rajendra Bagrarnikar, UK		Pregnancy Outcomes in Adult Congenital Heart Disease Women: A Single Center Experience - Emanuela D'Onise, Italy		Preliminary results - Rajendra Bagrarnikar, UK		
	LUNCH BREAK / JUNIOR SESSIONS / COMMITTEE MEETINGS / INDUSTRY SESSIONS								Exercise capacity is preserved, despite severe right ventricle dilation after repair of Tetralogy of Fallot - Benetta Leonardi, Italy		Hypotensive effects in the Fontan Circulation (THEF). Results from a phase 2 pilot study - Thomas Möller, Norway			
13:00 - 14:30	INDUSTRY SESSION MEDTRONIC													
14:30 - 16:30	Heart Failure and Transplantation Chair: Jesper Dua, UK & Hannele Sallinen, Austria		Indications and management of ICD therapy in paediatric HCM / APC position statement Chair: Juan Pablo Kaski, UK & Robbie Bartels, The Netherlands		Design your own career - leading with purpose. Chair: Enrica Piccioli, Italy & Ruth Heying, Belgium		Interventional Cardiology - Juniors meet seniors		LV noncompaction cardiomyopathy v. excessive LV trabeculation Chair: Inga Viagas, Germany & Jorge Casanova, Portugal		Oral Abstract Session 02 - Fetal Cardiology Chair: Isabelle Martin, Portugal & Colin McMahon, Ireland		Oral Abstract Session 03 - Nursing and Allied Health Professionals and Neurodevelopment and Psychosocial Care Chair: Amanda Pottetton, UK & Yali Vanheren, Belgium	
	Heart Transplantation in CHD: From Novelties to ACHD - Thomas Möller, Norway		The patient pathway - case presentations - Juan Pablo Kaski, UK		Career development and personal leadership - Learning from personal experience - Katalina Horváth, Sweden		Pulmonary hypertension: Bench to Bed Side		Morphology and classification of CAT - Stephen Sanders, USA		Antifetal intelligence and clinician collaboration to improve detection of fetal atrioventricular septal defects on ultrasound - Brian James Hollard, UK		The Whole is Greater than the Sum of its Parts: Sustainable, Low-Cost, and Impactful Implementing Fetal Care in Under-Resourced Areas: Task-Veiling, Telemedicine, and Collaboration - Brian James Hollard, UK	
	Pulmonary Hypertension in CHD: From Childhood to ACHD - Estelle Valdemarkis, France		Risk factors for SCD - Lidia Zmijewski, Poland		Postnatal imaging for surgical decision making - Tina Ojala, Finland		Postural strategies for CAT repair and reservations - Hisako Goto, Switzerland		Animal models of LV noncompaction / excessive LV trabeculation - Björke Jensen, The Netherlands		The role of the non-invasive abdominal fetal ECG in the detection and monitoring of fetal arrhythmias - Gian Cilfone, UK		The Whole is Greater than the Sum of its Parts: Sustainable, Low-Cost, and Impactful Implementing Fetal Care in Under-Resourced Areas: Task-Veiling, Telemedicine, and Collaboration - Brian James Hollard, UK	
	How can we improve heart and transplant-free survival for ACHD patients who develop heart failure? - Katrijn Janssens, UK		Risk prediction models - Ingvar Dörrbecker, Sweden		Genetics of pulmonary hypertension in Japan - Ayako Chiba-Nagai, Japan		Genetic and epigenetic risk factors for PAH in Japan - Ralf Berger, The Netherlands		Genetic and epigenetic risk factors for PAH in Japan - Ralf Berger, The Netherlands		The role of the non-invasive abdominal fetal ECG in the detection and monitoring of fetal arrhythmias - Gian Cilfone, UK		Conditions & Talk About Their Quality of Life - Marica Van Riper, USA	
	CHD management - Janneke Reijersma, The Netherlands		Genetic risk factors for PAH in Japan - Ralf Berger, The Netherlands		Pharmacological therapy for PAH in Japan - Shigeki Takasaki, Japan		Long-term clinical and imaging follow-up - Kai Thunissen, Leuven, Germany		Imaging in LV noncompaction / excessive LV trabeculation - Ricardo Pignatelli, USA		Genetic and epigenetic risk factors for PAH in Japan - Ralf Berger, The Netherlands		Conditions & Talk About Their Quality of Life - Marica Van Riper, USA	
			PAH in children: when and how to create shunts? - Damien Barret, France		PAH management - Kai Thunissen, Leuven, Belgium				Imaging in LV noncompaction / excessive LV trabeculation - Ricardo Pignatelli, USA		Genetic and epigenetic risk factors for PAH in Japan - Ralf Berger, The Netherlands		Conditions & Talk About Their Quality of Life - Marica Van Riper, USA	
14:30 - 16:30	Break													
16:30 - 18:00	Newer echocardiographic techniques in pediatric cardiology Chair: Carolyn Almora, USA & Colin McMahon, Ireland		The 2022 ESC Cardiomyopathy guidelines as applied to children and adolescents Chair: Sabine Klaassen, Germany & Juan Pablo Kaski, UK		Puzzle the experts! Chair: Sally Ann Clark, The Netherlands & Andreas Tüller, Austria		Pediatric pacing: new techniques, management and follow-up Chair: Thomas Kiebel, Germany & Roman Gebauer, Germany		Endovascular procedures Chair: Claude Fauchal, Portugal & Cecilia Quirós, France		Endovascular Session 06 - Genetics and Basic Science Chair: Claude Fauchal, Portugal & Cecilia Quirós, France		Patient and family empowerment in pediatric and adult congenital cardiology Chair: Eva-Lena Bratt, Sweden & Eva Gossens, Belgium	
	Clinical application of TTE and atrial stroke STI in CHD - Leo Lopez, USA		The ESC 2022 Cardiomyopathy guidelines as applied to paediatric patients - Juan Pablo Kaski, UK		Puzzles the experts!		Puzzles the experts!		Learning through the experts! - Possibility of live tele-echocardiography using expert groups in rescues: Anna Michaela, Germany		Echocardiography and its 6-arrhythmia prevent disease in a hypertrophic cardiomyopathy mouse model - Anna Theresa Pfleiderer, Germany		Patient empowerment, patient participation and patient-centeredness: a conceptual analysis - Zsuzsanna Horváth, Hungary	
	Echocardiography in CHD - Craig Fleisher, USA		Clinical application of TTE and atrial stroke STI in CHD - Leo Lopez, USA		Puzzles the experts!		Postural strategies for CAT repair and reservations - Hisako Goto, Switzerland		Postural strategies for CAT repair and reservations - Hisako Goto, Switzerland		Echocardiography and its 6-arrhythmia prevent disease in a hypertrophic cardiomyopathy mouse model - Anna Theresa Pfleiderer, Germany		Patient empowerment, patient participation and patient-centeredness: a conceptual analysis - Zsuzsanna Horváth, Hungary	
	PAH imaging in CHD - Lee Merten, Canada		Risk prediction models - Ingvar Dörrbecker, Sweden		Puzzles the experts!		Postural strategies for CAT repair and reservations - Hisako Goto, Switzerland		Postural strategies for CAT repair and reservations - Hisako Goto, Switzerland		Echocardiography and its 6-arrhythmia prevent disease in a hypertrophic cardiomyopathy mouse model - Anna Theresa Pfleiderer, Germany		Patient empowerment, patient participation and patient-centeredness: a conceptual analysis - Zsuzsanna Horváth, Hungary	
20:00	JUNIOR MEMBERS' PARTY & NURSES & ALLIED HEALTH PROFESSIONALS RECEPTION (optional, to be held at an offsite venue)													

Friday, 22 May 2020								
Time	Hall 1 - Archive Hall	Hall 2 - Despachos Hall	Hall 3 - Noble Hall	Hall 4 - Infante Hall	Hall 5 - D. Maria Hall	Hall 6 - D. Luis Hall	Hall 7 - Porta Hall	
08:00 - 09:00	BUSINESS MEETING Cardiac Imaging	BUSINESS MEETING Pediatric Cardiovascular Intensive Care	BUSINESS MEETING Sports Cardiology; Physical Activity and Prevention	BUSINESS MEETING Genetics, Basic Science and Myocardial Disease	BUSINESS MEETING Cardiovascular Morphology	BUSINESS MEETING Congenital heart surgery WG Business Meeting	BUSINESS MEETING Nursing and Allied Health Professionals	
09:00 - 10:00	Management of the pathologic RVOT Chair: Georgine Starmann, Germany & Aitor Souto, Germany	Atrio-ventricular septal defects - morphology and imaging from fetal to adult life Chair: Matthias Sigler, Germany & Agnieszka Grzyb, Poland	Most serious Canadian Pediatric Cardiology Association (CPCA)-APC Complex valve lesions: what is the best approach Chair: Nico Blom (The Netherlands) & Luis Merentes (Canada)	Biomarkers in pediatric heart failure and pulmonary hypertension Chair: Daniel de Wolf, Belgium & Anna Corrada Costa, Portugal	Challenges in Training and Professional Development Chair: Colin McNaughton, Ireland & Dimpna Calla Albert-Botros, Saudi Arabia	Central venous pressure augmentation against abdominal compression as a novel marker for cardiovascular load in the foetus Chair: Yutaka Matsui, Japan & TBA	Joint session with South African Nursing Group Organ: Global Partnership APC and South Africa Unit for Interdisciplinary Healthcare Collaboration and Research Advancement in Nursing and allied health professions	
10:00 - 12:00	Management of the pathologic RVOT Chair: Georgine Starmann, Germany & Aitor Souto, Germany	Atrio-ventricular septal defects - morphology and imaging from fetal to adult life Chair: Matthias Sigler, Germany & Agnieszka Grzyb, Poland	Most serious Canadian Pediatric Cardiology Association (CPCA)-APC Complex valve lesions: what is the best approach Chair: Nico Blom (The Netherlands) & Luis Merentes (Canada)	Biomarkers in pediatric heart failure and pulmonary hypertension Chair: Daniel de Wolf, Belgium & Anna Corrada Costa, Portugal	Challenges in Training and Professional Development Chair: Colin McNaughton, Ireland & Dimpna Calla Albert-Botros, Saudi Arabia	Central venous pressure augmentation against abdominal compression as a novel marker for cardiovascular load in the foetus Chair: Yutaka Matsui, Japan & TBA	Organ: Global Partnership APC and South Africa Unit for Interdisciplinary Healthcare Collaboration and Research Advancement in Nursing and allied health professions	
12:00 - 12:30	Management of the pathologic RVOT - are we treating too late? - Mary Gewillig, Belgium	Fetal imaging of ASD - Ana Teixeira, Portugal	State of the art lecture: Surgical options in CCTGA - David Barnes, Canada	Evaluation of training: Feedback - essence of a good communication - Ingo Vugge, Germany	Training the trainee - current practice and relevant tools - Omelia Milanes, Italy	Organizing Research and Clinical Practice through Collaborative Endeavors - Eva-Lena Bratt, Sweden & Maria Joachim, South Africa		
12:30 - 13:00	The feasibility and role of RVOT Ablation before or after PPH and self-expandable valves - Gunter Kral, Germany	Morphological spectrum of AVCD - Lucile Hocquel, France	Surgeon's perspective - David Barnes, Canada	Training the trainee - current practice and relevant tools - Omelia Milanes, Italy	Self regulated learning - view of a junior member on the ideal compounds of training - Skulite Interpretation of scientific data. Paper mills. Predatory journals. Research waste - Karolis Aukulis, Lithuania	Syndrome of the Month - Maria Joachim, South Africa	Empowering Africa's Future: Advancing Pediatric Nursing for Local Impact and Global Growth - Omelia Milanes, South Africa	
13:00 - 13:30	Management of the ventricular septal defect - Gunter Kral, Germany	AVSD in adult life - Werner Budts, Belgium	Case 1 TGA-P1 - Michel Galcic, Poland	Monitoring therapy with biomarkers in pediatric heart failure - Corrado Wolf, Germany	Case 2 TGA-P2 - Alfonso Hernandez, Mexico	Case 3 Normalization - Alison Howlett, Canada	Case 4 TGA-P3 - Michaela Kralova, Czech Republic	
13:30 - 13:45	BREAK							
11:00 - 11:30	MAUDORF LECTURE Chair: Thomas Krasemann, The Netherlands & Gianfranco Butera, Italy	Butera is the Latin word for way ma Michel-Bethke						
11:30 - 12:00	Oral Abstract Session 05 - Cardiac Imaging Chair: Emanuele Valangco, Switzerland & Jolte Sammarco, Portugal	Oral Abstract Session 06 - Interventional Cardiology Chair: Josep Maria Martí, Portugal & Jochen Wall, Germany	Oral Abstract Session 07 - Congenital Heart Surgery Chair: Manuel Pedro Magalhães, Portugal & TBA	Oral Abstract Session 08 - Cardiac Arrhythmias and Electrophysiology Chair: Alice Mahler, France & Jüha-Matti Heponiemi, Finland	Oral Abstract Session 09 - Cardiac Imaging Chair: Michael Höglund, Germany & Michaela Kralova, Czech Republic	Oral Abstract Session 10 - Cardiac Arrhythmias and Electrophysiology Chair: Michael Höglund, Germany & Michaela Kralova, Czech Republic	Oral Abstract Session 11 - Cardiac Imaging Chair: Michael Höglund, Germany & Michaela Kralova, Czech Republic	
12:00 - 12:30	Cardio reference values in children and adolescents for global function index (GFI) and myocardial contraction fraction (MCF) - Bett Horke, Germany	The practical balloon atrial deflation in the current era - A survey by the junior members of the European Heart Valve Research Group of the APC - Gautham Nagpal, UK	Local pulmonary administration of factor VIIa (Prothrombin) in massive pulmonary haemorrhage in post-operative cardiac infant - Mohammad Hassan Hamed, Saudi Arabia	Antithrombin in congenital heart disease: a nationwide cohort study - Eva-Helen Bergersen, Denmark	Antithrombin in congenital heart disease: a nationwide cohort study - Eva-Helen Bergersen, Denmark	Antithrombin in congenital heart disease: a nationwide cohort study - Eva-Helen Bergersen, Denmark	Antithrombin in congenital heart disease: a nationwide cohort study - Eva-Helen Bergersen, Denmark	
12:30 - 13:00	Right ventricular function in adolescents, athletes, pulmonary hypertension and diagnosis of Fetal - Dan M. Donahue, UK	Right ventricular function in adolescents, athletes, pulmonary hypertension and diagnosis of Fetal - Dan M. Donahue, UK	The practical balloon atrial deflation in the current era - A survey by the junior members of the European Heart Valve Research Group of the APC - Gautham Nagpal, UK	Comparative analysis of Tissue Thromboplastin and Activated Partial Thromboplastin Time in Pediatric Heart Surgery - Katalin Balazs, Hungary	Comparative analysis of Tissue Thromboplastin and Activated Partial Thromboplastin Time in Pediatric Heart Surgery - Katalin Balazs, Hungary	Comparative analysis of Tissue Thromboplastin and Activated Partial Thromboplastin Time in Pediatric Heart Surgery - Katalin Balazs, Hungary	Comparative analysis of Tissue Thromboplastin and Activated Partial Thromboplastin Time in Pediatric Heart Surgery - Katalin Balazs, Hungary	
13:00 - 13:30	Diagnostic myocardial diffusion assessed by shear wave elastography in children with a Fontan procedure - Michaela Kralova, Czech Republic	Diagnostic myocardial diffusion assessed by shear wave elastography in children with a Fontan procedure - Michaela Kralova, Czech Republic	Transcatheter Atrial Flow Regulator device implantations in restrictive cardiomyopathy: bridge to transcatheter or deflation therapy - Bernd Hammann, Germany	Comparison of Tissue Thromboplastin and Activated Partial Thromboplastin Time in Pediatric Heart Surgery - Katalin Balazs, Hungary	Comparison of Tissue Thromboplastin and Activated Partial Thromboplastin Time in Pediatric Heart Surgery - Katalin Balazs, Hungary	Comparison of Tissue Thromboplastin and Activated Partial Thromboplastin Time in Pediatric Heart Surgery - Katalin Balazs, Hungary	Comparison of Tissue Thromboplastin and Activated Partial Thromboplastin Time in Pediatric Heart Surgery - Katalin Balazs, Hungary	
13:30 - 14:00	Diastolic Radionuclide Feature Signatures in CG Sequences of Children and Adolescents with Myocardial Health and Disease - Michaela Kralova, Czech Republic	Diastolic Radionuclide Feature Signatures in CG Sequences of Children and Adolescents with Myocardial Health and Disease - Michaela Kralova, Czech Republic	Diastolic Radionuclide Feature Signatures in CG Sequences of Children and Adolescents with Myocardial Health and Disease - Michaela Kralova, Czech Republic	Diastolic Radionuclide Feature Signatures in CG Sequences of Children and Adolescents with Myocardial Health and Disease - Michaela Kralova, Czech Republic	Diastolic Radionuclide Feature Signatures in CG Sequences of Children and Adolescents with Myocardial Health and Disease - Michaela Kralova, Czech Republic	Diastolic Radionuclide Feature Signatures in CG Sequences of Children and Adolescents with Myocardial Health and Disease - Michaela Kralova, Czech Republic	Diastolic Radionuclide Feature Signatures in CG Sequences of Children and Adolescents with Myocardial Health and Disease - Michaela Kralova, Czech Republic	
14:00 - 14:30	LUNCH BREAK / JUNIOR SESSIONS / COMMITTEE MEETINGS / INDUSTRY SESSIONS							
13:30 - 14:20	INDUSTRY SESSION GE		Junior Session: Coronary arteries anomalies in the pediatric age Chair: Fabrizio Micali, Italy Co-Chair: Agnieszka Grzyb, Poland & Said Bichai, France					
14:30 - 15:00	New percutaneous therapies to treat advanced heart failure Chair: Nick Haas, Germany & Hindriks Döse, Switzerland & José Cláudio Martins, Portugal	ECG QUIZ: FROM ECG TO THE MECHANISM AND ABLATION SITE Chair: Fabrizio Drago (Italy) Speakers: Joachim Hebe (Germany), Juha-Matti Heponiemi (Finland)	The borderline left heart: challenge or opportunity for a biventricular outcome? Chair: Amritka Ohman, Sweden & Olala Khrusche, France	Pulmonary hypertension: Classification and Management Chair: Damien Bonnet, France & Nicola Boyd, UK	ECG - APC Joint Session Novel catheter-based approaches in congenital heart disease Chair: Peter Liu, Sweden & Sankaran Iyer, India	Cardiac Fitness Programs in Pediatric Congenital Heart Disease (in association with the Canadian Pediatric Cardiology Association) Chair: Antonio Pires, Portugal & Barbara Cirigli, Canada	Education in CHD patients and their families Joint / WG: Nursing and Allied Health Professionals & Educational Committee Chair: Lynda Sheehan, UK & Olli Pitkänen, Finland	
15:00 - 15:30	Failure following TGA - TBA	Failure following TGA - TBA	Imaging of the borderline left heart: how to predict a biventricular repair - John Simpson, UK	Imaging of the borderline left heart: how to predict a biventricular repair - Julie Wacker, Switzerland	ECG - APC Joint Session Novel catheter-based approaches in congenital heart disease Chair: Peter Liu, Sweden & Sankaran Iyer, India	Cardiac Exercise Programs 2.0 - From supervised inpatient training to app-based outpatient approaches in children - Jan Müller, Germany	How to educate patients and their families in congenital heart disease related topics? - Dimpe Ummenhofer, Germany	
15:30 - 15:45	Junior case presentation - Nick Haas, Germany	Junior case presentation - Nick Haas, Germany	Postnatal imaging of HLHC: echocardiography, CT or MRI for biventricular surgical planning? - Antonio Hermsal, UK	Prostacyclin use in children with PAH - Damien Bonnet, France	ECG - APC Joint Session Novel catheter-based approaches in congenital heart disease Chair: Peter Liu, Sweden & Sankaran Iyer, India	Training programs in CHD: current status and future directions - Barbara Cirigli, Canada	Education of the patient and education of patients and informed caregivers of patients with congenital heart disease: What impact can we expect? - Eva Gossens, Belgium	
15:45 - 16:00	Junior case presentation - TBA	Junior case presentation - TBA	The inevitable sequelae after biventricular repair for HLHC: how to image best? - Emanuele Valangco, Switzerland	Advanced therapies for PAH beyond vasodilators - George Hammann, Germany	ECG - APC Joint Session Novel catheter-based approaches in congenital heart disease Chair: Peter Liu, Sweden & Sankaran Iyer, India	Rationale and Approach of Exercise Interventions in Children with Fontan Circulation - Michael Khairy, Canada	Education of CHD patients and their families - benefits and expectations - Ana Julia Reis, Portugal	
16:00 - 16:30	Setting up an Advanced Adult Fontan Clinic Chair: Jolanda Sabatino, Italy & Cristina Cruz, Portugal	The Ultimate Surgical Adventure? PA VSD MR/AS Chair: Jose Freitas, Portugal & Bram van Wijk, The Netherlands	Current Status of Management of Pediatric Heart Failure Chair: Julie Walker, Switzerland & Hosen Haas, Germany	What's new in arrhythmia Chair: Michal Odernander, Sweden & Georgia Brugada, Spain	Cardi-Abstract Session 9 - General Cardiology Chair: Juana Miraçol, Portugal & Frank Connery, UK	Cardiac Fitness Programs in Pediatric Congenital Heart Disease (in association with the Canadian Pediatric Cardiology Association) Chair: Antonio Pires, Portugal & Barbara Cirigli, Canada	Cardi-Abstract Session 10 - General & Interventional Cardiology Chair: Ralph Berger, The Netherlands & António Marinho, Portugal	
16:30 - 18:00	CPIT II: Ech in the assessment of Fontan hemodynamics - Alexander Van De Brusse, Belgium	PA VSD MR/AS: multimodality diagnostic imaging in infants - Francisco Belmonte, Italy	Perfusionist interventional device implantation and mechanical support for pediatric heart failure - Antonio Hermsal, UK	New drugs and devices for treatment of arrhythmia I - Thomas Kleber, Germany	Cardio-Abstract Session 9 - General Cardiology Chair: Juana Miraçol, Portugal & Frank Connery, UK	Education in CHD patients and their families Joint / WG: Nursing and Allied Health Professionals & Educational Committee Chair: Lynda Sheehan, UK & Olli Pitkänen, Finland	CPIT II: Ech in the assessment of Fontan hemodynamics at Fontan with Long-term Outcomes - Silvana Melmed, USA	
18:00 - 18:30	The liver during follow-up - Aleksander Cieplucha, Poland	Interventional imaging: how to optimize the pulmonary vascular bed - Ingrid Van Beurden, The Netherlands	Noninvasive ventilation in pediatric cardiac failure - Juan Sanchez de Toledo, Spain	Antiarrhythmic drugs and devices for the prevention of sudden death due to arrhythmia - Victor Waldmann, France	Cardio-Abstract Session 9 - General Cardiology Chair: Juana Miraçol, Portugal & Frank Connery, UK	Education in CHD patients and their families Joint / WG: Nursing and Allied Health Professionals & Educational Committee Chair: Lynda Sheehan, UK & Olli Pitkänen, Finland	Long-term outcomes and survival after Fontan with Long-term Outcomes - Silvana Melmed, USA	
18:30 - 19:00	Physical activity - a valuable therapeutic approach in Fontan patients - Jose Rato, Portugal	Imaging for Long-term clinical follow up and reinterventions - Ingo Vugge, Germany	How to assess drug efficiency after the start of medical anti-arrhythmic treatments - Georgia Brugada, Spain	Antiarrhythmic drugs and devices for the prevention of sudden death due to arrhythmia - Victor Waldmann, France	Cardio-Abstract Session 9 - General Cardiology Chair: Juana Miraçol, Portugal & Frank Connery, UK	Education in CHD patients and their families Joint / WG: Nursing and Allied Health Professionals & Educational Committee Chair: Lynda Sheehan, UK & Olli Pitkänen, Finland	Long-term outcomes and survival after Fontan with Long-term Outcomes - Silvana Melmed, USA	
19:00 - 20:00	Setting up an Advanced Adult Fontan Clinic Chair: Jolanda Sabatino, Italy & Cristina Cruz, Portugal	The Ultimate Surgical Adventure? PA VSD MR/AS Chair: Jose Freitas, Portugal & Bram van Wijk, The Netherlands	Long-term clinical access in children with prolonged hospital stay for heart failure/mechanical support - Tatjana Sekulic, Ireland	Antiarrhythmic drugs and devices for the prevention of sudden death due to arrhythmia - Victor Waldmann, France	Cardio-Abstract Session 9 - General Cardiology Chair: Juana Miraçol, Portugal & Frank Connery, UK	Education in CHD patients and their families Joint / WG: Nursing and Allied Health Professionals & Educational Committee Chair: Lynda Sheehan, UK & Olli Pitkänen, Finland	Long-term outcomes and survival after Fontan with Long-term Outcomes - Silvana Melmed, USA	
20:00	MEETING NETWORKING DINNER (optional ticket event, to be held at an offline venue)							

Saturday, 31 May 2024							
Time	Hall 1 - Archiv Hall	Hall 2 - Despachos Hall	Hall 3 - Noble Hall	Hall 4 - Infante Hall	Hall 5 - D. Maria Hall	Hall 6 - D. Luís Hall	Hall 7 - Porto Hall
09:00 - 10:30	<p>Simple - TGA: not always that simple Chair: Victoria Cowell, UK & Rui Antunes, Portugal</p> <p>D-TGA/IVS: Survey management of simple TGA: what are we doing at the moment? Different approaches in different countries concerning delivery, timing of delivery - Anna Seale, UK</p> <p>D-TGA/IVS: Focus on the heart: Predicting restrictive foramen ovale in fetal TGA - Deepak Srivastava, Agapito Gómez, Spain</p> <p>D-TGA Focus: Maternal hyperoxigenation and TGA as diagnostic tool - Edgar Jaeggi, Canada</p> <p>D-TGA: The interventionists view - Thomas Kraesemann, The Netherlands</p>	<p>Management of Advanced heart failure patients in Pediatric cardiac ICD Chair: Nicole Sekaruk, Switzerland & Maria Jose Baptista, Portugal</p> <p>Management of PPH failure: indications ECMO and mechanical support - Dimpna Callia Albert-Brotons, Saudi Arabia</p> <p>IVAD as destination therapy in children: really an option? - Karin Tran-Lundmark, Sweden</p> <p>Mechanical support in single ventricle - Hakan Wahlestedt, Sweden</p>	<p>Lymphatic system in health and disease Chair: Annalisa Angelini, Italy & Birthe Hordal, Denmark</p> <p>Morphology of thoracic and abdominal lymphatic system - Adine Kolesnik, Poland</p> <p>Lymphodynamics - how does the lymphatic system work - Christoph Bauer, Austria</p> <p>Imaging of lymphatic system - Petru Usiba, Sweden</p>	<p>Development of novel treatments in paediatric heart muscle disease Chair: Silvia Aravecchia, Portugal & Damien Bonnet, France</p> <p>Nucleic acid therapies for cardiomyopathies - Franziska Seifert, Germany</p> <p>Cardiac myosin inhibitors in paediatric and adolescent HCM - Juan Pablo Kausi, UK</p> <p>MTC inhibition in RCMopathies - Cordula Wolf, Germany</p> <p>SGII D in paediatric heart failure - Damien Bonnet, France</p>	<p>Haemodynamics in Pulmonary Arterial Hypertension Chair: Colin McMahon, Ireland & Georg Hanaman, Germany</p> <p>Haemodynamic definition of PH: does it apply to all ages and to all contexts - Ralf Berger, The Netherlands</p> <p>Use of new paediatric VO2max reference equations to evaluate aerobic fitness in overweight or obese children with congenital heart disease - Pascal Amador, France</p> <p>How do haemodynamics guide management/treatment in PAH? - László Abbronzini, Hungary</p> <p>Are we measuring pulmonary vascular resistance accurately - Daniel de Wolf, Belgium</p> <p>Cold haemodynamics to monitor in children with PAH? - Janet Gyurkak, France</p>	<p>Oral Abstract Session 11 - Sports & General Chair: Ana Cercato, Portugal & TBA</p>	<p>Living with a "potentially lethal disease" Joint / WG: Neurodevelopment & Cardiac Care & Nursing and Allied Health Professionals & Cardiac Dysrhythmias and Electrophysiology</p> <p>The impact of a pacemaker and ICD on the quality of life in children - Christian Paech, Leipzig, Germany</p> <p>Screening of children after family history of sudden cardiac death - Jenny Tait, UK</p> <p>The patients perspectives</p>
10:30 - 11:00	<p>Failure and successes Chair: Shakeel Qureshi, UK & Thomas Kraesemann, The Netherlands</p> <p>Supra-aortic Vena Cava rupture with pericardial blood effusion - Domenico Sirico, Italy</p> <p>Identifying a recurrent fistula between the oesophagus and a thoracic artery: when the sheath is stuck - Seid Bichakci, France</p> <p>Permanence of a recanalized vertical vein after repair of total anomalous pulmonary venous connection - Stana Krsul, Serbia</p> <p>The importance of being longer - Gianni Fracca Botella, Italy</p>	<p>Natural and unnatural history of congenital heart disease: Case based learning Chair: Jean Paul Qureshi, UK & Paolo Ferrero, Italy</p> <p>Meet the Morphologist Session: Morphology=Imaging=diagnosis session - Case version</p> <p>Imaging by protocol: Robert Anderson [34], Adam Kolesnik [Poland], Monique Jangklied (The Netherlands), Annalisa Angelini [Italy]</p> <p>Case presentation: VSD correction in patients with double inlet left ventricle during stages of single-ventricle - Alper Guvenç, Turkey</p> <p>Imaging by protocol: Robert Anderson [34]</p> <p>Final discussion:</p> <ul style="list-style-type: none"> Case presentation: Coexistence of Atrioventricular Septal Defect and Hypertrophic Cardiomyopathy in patient with Eisenmenger syndrome - Zacharias Panagiotis, Greece Imaging by protocol: Robert Anderson [34], Adam Kolesnik [Poland], Monique Jangklied (The Netherlands) Case presentation: Arrested Diagnosis of Pulmonary Atresia with intact ventricular septum - SRI Narendran Muthal, EastF, Australia Imaging by protocol: Robert Anderson [34], Adam Kolesnik, Poland Final discussion: <p>Case presentation: The many faces of pulmonary venous return - Quirine Sariaas Martens, Portugal</p> <p>Imaging by protocol: Monique Jangklied, The Netherlands</p> <p>Final panel discussion (all cases)</p>	<p>Arhythmogenic Cardiomyopathy in Pediatric Patients Chair: Fabrizio Drago, Italy & Juan Pablo Kausi, UK</p> <p>ACM from genetics to phenotype in pediatric patients - Juan Pablo Kausi, UK</p> <p>Clinical and histological expression in pediatric patients - Lidia Zielińska, Poland</p> <p>Risk stratification for primary prevention - Roman Gekeler, Germany</p>	<p>Neuroprotection after neonatal cardiac surgery in intensive care - an Iuson? Chair: Joan Sanchez de Toledo, Spain & Ricardo Munoz, USA</p> <p>Why is the brain at risk? - Ricardo Munoz, USA</p> <p>How to assess the brain function - Damien Schaffner, France</p> <p>How to protect the brain during surgery - Reinhard Staubach, Switzerland</p> <p>Management of the brain after surgery - Monica Jangklied, Spain</p>	<p>Oral Abstract Session 12 - Pulmonary & General Chair: Karin Tran-Lundmark, Sweden & Jorge Monteiro, Portugal</p> <p>ABD-Incompatible heart transplants in older children: a new paradigm in transplant? - Padis Hobis, UK</p> <p>Transplantation in experimental congenital heart disease: a natural history study - Emmanuel Mwengela, The Netherlands</p> <p>Orphan-associated liver Disease: PALS in the United States: experience and lessons learned from the European Registry - Andrea Rudolph, Sweden</p> <p>Endovascular procedures in the treatment of congenital heart disease - Monique Jangklied, Spain</p> <p>Management of the heart in the long term and Long term follow-up - Carmen Ruiz Marta, Spain</p>	<p>Joint / WG: Neurodevelopment & Cardiac Care & Nursing and Allied Health Professionals & Cardiac Dysrhythmias and Electrophysiology</p> <p>The impact of a pacemaker and ICD on the quality of life in children - Christian Paech, Leipzig, Germany</p> <p>Screening of children after family history of sudden cardiac death - Jenny Tait, UK</p> <p>The patients perspectives</p>	
12:30 - 13:30	<p>Keynote Lecture, AEPC Abstract Awards & Closing</p> <p>Lecture: Cardiomyopathy – from gene discovery to precision medicine - Sabine Klassen, Germany</p>
