AEPC intervention WG:

6th Junior training course in cardiac catheterisation and intervention:

17-19th March Rotterdam, NL

Local organiser: Dr M Witsenburg

We would like to invite applications from trainee’s for the above course. The course is aimed at those developing an interest in invasive congenital cardiology and purposefully deals with the “fundamentals” of this area rather than advanced techniques, through a series of lectures and hands on sessions run by an international faculty.

The course is heavily subsidised by the working group such that registration is 200 Euro, including 2 nights hotel stay (but not travel expenses).

A maximum of 35 attendees can be accommodated. Please note that the last course in Linz was heavily over subscribed, places are allocated on a first come first served basis but priority will be given to existing AEPC junior members.

Please apply by email to: john.thomson8@nhs.net copying the email to lmauri.md@gmail.com

Include your name, institution, country, and AEPC junior membership status.

Dr John Thomson
Honorary secretary, on behalf of the AEPC intervention WG
